学生反馈

Students Feedback

The programme has definitely changed my ideas about education. The exposure to a diverse and international community of students, combined with studying at Oxford, and having helpful mentors who shared their own experiences at Oxbridge colleges with us, completely changed my outlook on learning.

It made me realize that learning is meant to have healthy competition, and is supposed to be fun and challenging. Fun and learning can and should co-exist, and there definitely should be a healthy balance between the two.
